**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Information Disclosure Statement***

2. The IDS filed on June 12, 2006 is hereby acknowledged and has been placed of record.  
Please find attached a signed copy of the IDS.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims appear to be a literal translation into the English language from a foreign (Japanese) document. As such, the syntax of the claims in some instances is difficult to understand, rendering the claims indefinite. Below are some examples of indefinite issues in the claims.

In claim 1, on lines 6-7, the recitation, “a rotating body disposed at an upper side of the nozzle body and penetrating slidably the nozzle bar in a penetration bar formed on a center of the rotating body” is unclear.

Further, in claim 1, on line 8, the recitation, “the lower bar as urged in an upper direction” is unclear. Also, “the lower bar” lacks antecedent basis in the claim.

Further, in claim 1, on lines 21-24, the recitation, “wherein a fitting piece formed as projecting at a lower side of an outer periphery of the rotating body is rendered insertable in the insertion intervals and is disposed as facing to such the lower end surface of the sending blade as forming the tapered portion at a side of a bottom surface wall of the annular body” is unclear. Also, “the sending blade” lacks antecedent basis in the claim.

Further, in claim 1, on lines 26-28, the recitation, “wherein the fitting piece pushed lower is inserted in the insertion interval along with each of inclined surfaces of the sending blade of the annular body and receiving blade of the upper sleeve so the fitting piece as to be able to positionally move in the same direction one time” is unclear.

The above noted indefiniteness issues are merely exemplary and are not to be taken as an exhaustive list of all such instances. Applicant should carefully review the claims in their entirety for compliance with 35 U.S.C. 112, second paragraph.

***Allowable Subject Matter***

5. Claims 1-3 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patents to Gorman, Meshberg, Pfeiffer et al., Alband and Scarrett et al., and US Patent Application Publication to Di Giovanni et al., are cited as of interest.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Darren W. Gorman whose telephone number is 571-272-4901. The examiner can normally be reached on M-F 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Len Tran can be reached on 571-272-1184. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
